Technical Skills:

| | |
|------------------------------|--|
| Operating Systems | Windows. |
| Programming Languages | JavaScript |
| Frameworks | React JS , Ember JS ,D3 JS, Next JS(hands on experience) |
| Web Services | Rest API |
| Tools | AWS , Redux |
| Web Technologies | HTML, JavaScript, CSS,Redux ,Tailwind CSS,Material UI |
| Version Control Tools | GIT (GitLab) |
| IDEs | VS Code, Eclipse |

EDUCATION:

- B.Tech 2019** from Dr. A.P.J Abdul Kalam Technical University with the aggregate of 76%.

PROJECTS:

| | |
|-------------------|--|
| PROJECT #3 | : Contact Search C3-Application |
| Client | State Farms |
| Role | Developer |
| Duration | Jul 2020 to till now |

| | |
|------------------|--|
| Environment | React JS , AWS , D3 JS. |
| Description | <ul style="list-style-type: none"> • RNA (Reporting and Analytics) -To provide Contact Search users with ability to search across Cisco, Hercules and Live Person data. • Dashboard -To create a dashboard to display data in charts. To create rest API for fetching metrics data for displaying in charts. |
| Responsibilities | <ul style="list-style-type: none"> • Developed rest API using aws services like lambda, SQS, S3, API gateway. • Used Postman plug-in and in-built aws test console to test the rest API's . • Configured Roles and policies for API for security purpose. • Designed topology diagram using draw.io to understand the flow. • Implementation of front-end application. • Developed responsive dashboard using React js and D3 js. • Performed unit test and load test(in Kibana). |

| | |
|-------------------------|---|
| PROJECT #2 | : Hercules Vue |
| Client | State Farms |
| Role | UI Developer |
| Duration | Apr 2020 to Jun 2020. |
| Environment | Ember JS |
| Description | Platform to have information about products,services,tools and dashboards within Hercules for ease in finding and containing links for documentations . |
| Responsibilities | <ul style="list-style-type: none"> • Developed UI using Ember JS. • Made Responsive using Tailwind CSS (Everything mobile first) • Followed JavaScript coding Standards. |

| | |
|--------------------|--|
| PROJECT #1 | : Safety Recall Management |
| Client | FCA (Fiat Chrysler Automobile) |
| Role | Developer |
| Duration | Aug 2019 to Mar 2020. |
| Environment | Java,JDBC |
| Description | <ul style="list-style-type: none"> • To develop application for seamless Vehicle Ordering and Inventory Management (VOIM) for having safety recalls. • It helped dealers to order vehicles and to do safety recalls prior to a |

| | |
|------------------|--|
| | <p>certain span of time after the ordering to update their inventory.</p> <ul style="list-style-type: none"> • It has two modules -stocks and sold. • Dealers can check both modules simultaneously by comparing safety recall numbers. They can compare safety recall no with other dealers as well and initiate the SR for stock and sold orders simultaneously within a given span of time. |
| Responsibilities | <ul style="list-style-type: none"> • Involving Development based on business requirement. • Involved in writing unit test cases for modifications which are done. |
